Jason Holt

Mobile × (future) NLP | M.Sc. CompLing candidate | Founder, Jason
Holt Digital | Official partner — Word Mill Creative
Frankfurt, Hesse, Germany

Summary

Former computer science and visual design educator. I've been
building since 2014 and shipping production, cross-platform apps
since 2024. I founded Jason Holt Digital and partnered with Word
Mill Creative to build the official Mythic GME 2e companion apps—
our flagship product. The work is ongoing and community-driven. If
you enjoy tabletop RPGs, this might be your app.

On October 13, 2025, I begin the M.Sc. in Computational Linguistics
at the University of Stuttgart. I'm focused on practical ways mobile
and (future) NLP can work together.

Recent work: Mythic GME Mobile and the DRM-free desktop release
of Mythic GME Digital, both with ongoing updates.

Frankfurt-based; remote friendly.

Open to: part-time, contract, or working-student roles aligned with
this mobile × (future) NLP focus (and possibly other interesting
pathways!).

Experience

Jason Holt Digital
Independent Software Developer & Product Designer
August 2024 - Present (1 year 4 months)
Frankfurt, Hesse, Germany

• Architected and launched the official Mythic GME 2e companion app
across iOS, Android, and desktop platforms, successfully transitioning from
legacy .NET MAUI to a modern Flutter architecture
• Led end-to-end product development from concept to deployment, including
strategic planning, feature prioritization, and release management
• Designed and implemented sophisticated state management solutions using
MVVM architecture, ensuring scalability and maintainability across platforms

• Orchestrated a community-driven development process with 200+ active beta testers, achieving high user satisfaction through regular engagement and iterative improvements
• Established and maintained strategic relationships with intellectual property holders, managing licensing agreements and ensuring brand alignment
• Transformed complex gaming algorithms into intuitive user experiences through accessibility-focused design and continuous user feedback
• Implemented comprehensive analytics and crash reporting systems to monitor app performance and user engagement metrics
• Created and maintained transparent development roadmaps, effectively communicating progress through regular community updates and feature demonstrations

Uplift Education
DP Computer Science and Digital Design Teacher
July 2021 - June 2024 (3 years)
Dallas, Texas, United States

Inspiring, unlocking, and unleashing student creativity in and out of the classroom. Teaching Digital Design & Media Production, DP Computer Science, Yearbook, and eSports. Facilitating content meetings with teachers in the network for Digital Design & Media Production.
